Policies

The university administration adopted a policy of decentralization and deconcentration.

University management in all its forms will be framed in a continuous planning process. All activities in the university will be evaluated and the results will be utilized to continuously improve processes.

The criteria and mechanisms to enter the university as a student or employee will ensure equal opportunities and selecting the best candidates.

The investment in the university will be determined by the Institutional Development Plan. The university management conducts regular welfare programs for the entire university community. The range of academic programs must be the consequence of a social need. The academic activity will be directed to the articulation of teaching with research and extension.

The academic work is directed towards strengthening the academic and interdisciplinary work. Promote the intellectual manifestations and support its disclosure. Allocate annually the budget funds in accordance with the requirements of approved research projects.

Maintain ongoing relationships with the environment. Organize and strengthen academic supports. Ensure the university information system. Have an ongoing communication within the university and of this with the environment.
