

Master in Physics Instrumentation

Objectives

Teach the students in areas of Physics, Electrical Engineering, Electronics and related, in order to develop research skills in the field of Physics Instrumentation.

Professional and Occupational Profile

The Master in Physics Instrumentation can work as:

- Designer and manufacturer of laboratory equipment for teaching.
- Designer and manufacturer of medical equipment in hospitals.
- Designer and manufacturer of equipment for measuring physical parameters.
- Designer of software related to the physical implementation.
- A person engaged in processes of adaptation and modernization of equipment, based on new technologies.
- Entrepreneurs.
- Researcher and consultant.
- University Professor.
